30 years Heytex Neugersdorf GmbH: A thirty-year success story

Ebersbach-Neugersdorf, September 2023

Heytex Neugersdorf GmbH, a leading manufacturer of technical textiles, proudly celebrates its 30th anniversary. Since 1993, the company has been synonymous with quality, innovation and first-class customer service.

Over the past three decades, Heytex Neugersdorf GmbH has undergone a remarkable development. The company was taken over as Herzog in 1993 by the then Julius Heywinkel GmbH and has developed into a globally recognized market leader in the field of technical textiles in the current Heytex Group. Its melt roll calender coating line enables the production of technically highly sophisticated and specialized products. The company's success story is the result of an unwavering commitment to quality and continuous innovation.

Heytex Neugersdorf GmbH has built an outstanding reputation for manufacturing the highest quality coating, laminating and extrusion products. Their technical textiles are used in a variety of industries including flexible containers, gate goods, biogas membranes, boat materials, environmental protection and more. Customers worldwide rely on Heytex's outstanding performance and customized solutions.

"The 30th anniversary is an important milestone for Heytex Neugersdorf GmbH," said Hans-Dieter Kohake, managing director of the Heytex Group. "We are proud to look back on three decades of innovation and success. This success would not have been possible without the dedication and commitment of our talented team and the support of our customers."

The 30th anniversary celebrations will take place directly at the site at the end of September and will include various events. Heytex Neugersdorf GmbH will also focus on its commitment to sustainability and social responsibility to underscore the company's positive impact in the region and beyond.

About the Heytex Group: Since 1913, the Heytex Group has been one of the world's leading manufacturers in the development of high-quality and functionalized technical textiles and produces them with more than 550 employees at five production sites on three continents in Bramsche & Ebersbach-Neugersdorf (Germany), Nijverdal (Netherlands), Zhangjiagang (People's Republic of China) and in Pulaski (USA). No matter whether laminated or coated textiles, truck tarpaulins, large-format digital printing of advertising banners or top technological products such as biogas membranes: Outstanding technical know-how, first-class customer service, the consistent use of state-of-the-art production facilities, uncompromising quality standards for every single product and the worldwide availability of our products are the unifying element of all companies in the Heytex Group.
