

## HEYtent - Convincing competence in the field of tents and textile architecture

# Textile solutions

Project	TENNIS DOME
Installation year	2022
Location	Les Vans, Ardèche, Region Auvergne-Rhône-Alpes, France
Material	ark I (H5572-1015-LW)
Quantity	2,700m <sup>2</sup>
Construction	Losberger de Boer, France
Background Info	<p><b>Ark I</b> was chosen for this project not only for its visual characteristics but also because it meets the highest quality standards and ensures a long lifespan. Our ark range, representing top-tier <b>Textile Architecture</b>, consistently relies on Low Wick yarn and features a coating maximally equipped for weather resistance and maximum protection. The color 1015 (light ivory) was dictated by the architects of the French structures, who are authorized to impose specific colors on private facilities that do not clash with the landscape, especially when historical buildings are nearby.</p>
